

# JCD-SP Solar Panel Manual

## 01 Production Info

- Panel Material: High conversion efficiency monocrystalline silicon wafer, the converts efficiency will reach as high as 20%.
- Surface Material: Aluminium#6063
- Power: 4W
- Work Temperature: -20°C~65°C
- Wire Length: 1M
- 4 pieces of double sided tape for fixing

Models and Parameters (more info please refer to the labels)

JCD	SP	01	18V	A	4W	01	10
	Solar Panel	01: With black shell	Voltage	A: Without battery	Power	01: JST	Cable length
		02: With silver shell		B: With rechargeable battery		02: Micro USB	08: 0.8m
		03: Without shell				03: Type C	10: 1.0m
						04: Snap	12: 1.2m

## 02 Instruction

- Apply 2 pieces of double sided tape to both ends of the front of the solar panel
- Attach solar panels to a flat glass or wall surface facing the sun
- Connect the solar panel connection cable to the motor
- Please clean the surface of the solar panels regularly

### Installation
